## PSD60-2R

### Fuel Quantity Test Set

The PSD60-2R is an accurate, highly reliable, portable capacitance test set. Along with an aircraft specific interface, the PSD60-2R will test any AC Capacitive Fuel, Water, LOX, Engine Oil, or other AC capacitive system.

#### The PSD60-2R performs these functions:

- Measurement of total tank capacitance, individual tank units and compensators
- Simulation of capacitance for indicator calibration
- Simulation of compensator capacitance value for dry calibration
- Measurement of the insulation resistance of tank units and aircraft harness
- Measurement of coax center conductor to shield for fault isolation
- Display of capacitance resolution to 0.00 pF for accurate individual tank unit testing (in 199.99 pF range)

#### Features

- Compatible with AD 98-20-40 & AD 99-03-04 compliant aircraft (Mod 6 and above)
- Modular design for high reliability and low maintenance
- Closed box calibration using front panel controls – performed annually
- Battery powered with percent of charge displayed
- Maintenance codes displayed to aid in troubleshooting
- Distance-to-Fault (DTF) Mode determines the “length” of the wire or the approximate distance to a break in the wire or shield
- Large selection of aircraft specific interface cables available

A fuel tester that makes a powerful difference in line and hangar maintenance

Large selection of aircraft fuel interfaces available
